## Monthly Report

### FUND DESCRIPTION

The objective of Patrimonium, a subfund of MerclIn II SICAV, is to increase the value of your investment over the medium- to long-term. Under normal market conditions, the fund primarily invests in a diversified portfolio of equities and bonds from all countries worldwide, including from emerging market countries.

The fund may invest directly in equities or bonds, or indirectly by investing in units of other investment funds or in certificates of deposit. In order to take advantage or hedge against market fluctuations, or for effective portfolio management, the sub-fund may use derivatives.

The Fund Manager will select the various investment classes, sectors and countries in a flexible manner, on the basis of macroeconomic and financial criteria. This fund is suitable for investors who understand the risks of the fund and who wish to invest for a minimum investment horizon of 3 to 5 years.

### MANAGER'S COMMENT

Econocom is a European provider of B2B digital services. The company offers a mix of complementary activities for the management and financing of IT assets, including product distribution, IT services and IT financial services (leasing). The group generated EUR 3 billion in sales in 2019, the majority of which in France and the Benelux countries. 2019 was a transitional year for the company after challenging results in 2018, especially for the leasing division. This prompted the company to take action valued by bondholders, i.e. a focus on cash generation, productivity measures and cost-cutting efforts, as part of a renewed focus on the core businesses with a plan to dispose of non-core assets. First positive effects will occur in 2020.

The fund is invested in the convertible bond issued by Econocom. The company has an adequate liquidity profile, and the credit profile is expected to improve over time. At the current share price, the convertible bond is trading like a straight bond. The yield is attractive, providing a premium compared to that of the straight bond issued by the company. Moreover, the conversion option currently has no value, but this could change if the share price increases.

### The subfund's risk level reflects the following factor(s):

- The risk level does not reflect the potential impact of unusual market conditions or unforeseen events that may increase risk or trigger other risks such as:
- Counterparty risk: the subfund can lose money as a result of the failure of a market player with which it does business.
  - Credit risk: risk associated with bonds becoming worthless when the issuer of the bond is not able to repay its debt on maturity.
  - Liquidity risk: some financial securities may be impossible to sell quickly at a given time or may have to be sold at a discount.
  - Management risk: under abnormal market conditions, the usual management techniques may be ineffective or unfavourable.
  - Risk of derivatives: some derivatives may increase the volatility of the subfund or expose the subfund to losses that are higher than the price of the derivatives.
  - Operating risk: in any market, and especially in the emerging markets, the subfund may lose some or all of its money if there is a failure in the custody of assets or in case of fraud, corruption, political actions or any other adverse event.
