Monthly Report

FUND DESCRIPTION

MercLin Global Equity is a subfund of MercLin SICAV. The objective of the fund is to increase the value of your investment over the long term while outperforming the MSCI AC World Euro Index. The composition of the subfund's portfolio may differ significantly from that of its benchmark index. Under normal market conditions, the subfund primarily invests in a diversified portfolio of equities (at least 70% of its assets) and corporate bonds from OECD countries. The subfund may invest directly in shares or bonds or indirectly by investing in units of other investment funds. The fund is actively managed and the composition of its portfolio may differ from its benchmark. The manager invests only in sectors or companies in which it has a good command. It attaches particular importance to the quality of the company and the competitive advantage it has over its competitors. After that, the valuation of the company is obviously essential: paying too much for a good company is a bad investment. There is no magic formula for evaluating companies, each sector has its own specificities and must be analyzed in its own way.

The fund is suitable for investors who understand the risks of the fund and who have a minimum investment horizon of 3 to 5 years.
This investment policy is also mentioned in the key investor information of the fund.

² These performance numbers are based on historical data and are no guarantee of future results. YTD: Performance since the 1st of January of the current calendar year. This is a cumulative return. Performance of the MercLin Global Equity F Cap up to 18.08.2008 is that of the Athena Diversified Management Sub-fund, of which the MercLin Global Equity Sub-Fund is an identical successor.

⁵ MSCI AC World Euro Net dividend reinvested. The investment policy of the subfund does not include a tracking error objective with the benchmark. Performances of the subfund may therefore vary from the performance of the benchmark.

MANAGER'S COMMENT

One of the stocks within the portfolio that is enjoying some end-of-the-year momentum is Prosus. There are many factors that have contributed to the recent strength of the stock price and one of them was the value creation plan that the management team presented at the Prosus capital markets day that took place earlier this month. One of the aspects that was greatly appreciated by investors is that management team clearly understood that the macro-economic situation has changed. While Prosus had been aggressively looking for new investment opportunities over the past year, management now seeks to focus on building out the existing investments and increasing the profitability of these existing investments. The second element of the value creation plan is the continuation of the buyback scheme. Given that shares still trade at a strong discount to the value of the holdings within Prosus, these buybacks will be value accretive. The third aspect of the plan was the continued conviction in Tencent, which is by far the largest holding within Prosus. Tencent has faced a rough time in the past two years due to extended lockdowns in China, legislative pressure and disputes between the USA and China. 2023 is however set to become a year in which Tencent can reaccelerate its growth driven by easy comparables and other tailwinds. Prosus, which is the largest shareholder of Tencent, will ofcourse benefit greatly from a Tencent revival. All three of the aforementioned elements place Prosus in a solid position to continue its momentum into 2023. The above is an example of the application of the investment policy. Portfolio changes may occur at anytime.

Risk Indicator: Please consult the KIID and/or the Prospectus for more details.

The subfund's risk level reflects the following factor(s):

- Equity investments have greater volatility and higher risk than investments in bonds and money market instruments. The risk level does not reflect the potential impact of unusual market conditions or unforeseen events that may increase risk or trigger other risks such as:
 - Counterparty risk: the subfund can lose money as a result of the failure of a market player with which it does business.
 - Credit risk: risk associated with bonds becoming worthless when the issuer of the bond is not able to repay its debt on maturity.
 - Liquidity risk: some financial securities may be impossible to sell quickly at a given time or may have to be sold at a discount.
 - Management risk: under abnormal market conditions, the usual management techniques may be ineffective or unfavourable.
 - Operating risk: in any market, and especially in the emerging markets, the subfund may lose some or all of its money if there is a failure in the custody of assets or in case of fraud, corruption, political actions or any other adverse event.
