MANAGER'S COMMENT

Founded in 2008, Zalando has emerged as Europe's premier online fashion platform, with 51 million active customers, operating in 25 countries as of 2022. With sales of EUR 10.3 billion and a dedicated workforce of over 17,000 employees, the company has firmly established itself in the fashion market.

Despite its already significant presence, Zalando remains ambitious, aiming to increase its share of the European fashion market from the current 3% to an impressive 10% in the long term. To achieve this, the company is actively pursuing a strategic plan centered around transitioning to a platform / retail model instead of a pure online retailer. This move is expected to enhance the company's credit profile, ensuring resilience and adaptability over the medium to long term by combining retail and marketplace elements.

Zalando demonstrated exceptional performance in 2020, buoyed by increased demand during pandemic-related lockdowns, and to a lesser extent, in 2021. However, in 2022, the company experienced a slowdown in topline growth, coupled with higher expenses and rising inventories. In response, Zalando swiftly implemented cost-cutting measures to safeguard and enhance its margins.

The company's financial position remains robust, with low leverage and a solid liquidity position, contributing to its stability and growth prospects. Consequently, the fund has taken a small position in the company's convertible bond. This investment offers an attractive yield while also providing the potential for equity upside over the next three years if the share price increases. This is an example of the application of the investment policy. *Portfolio changes can occur at any time.*
