Monthly Report

FUND DESCRIPTION

MercLin Global Equity is a subfund of Kempen International Funds. The objective of the subfund is to increase the value of your investment over the long term while outperforming the MSCI AC World Euro Index. Under normal market conditions, the subfund primarily invests in a diversified portfolio of equities (at least 70% of its assets), corporate bonds from OECD countries or in other investment funds. The subfund is actively managed and the composition of its portfolio may differ from its benchmark. The subfund is suitable for investors who understand the risks of the subfund. This investment policy is also mentioned in the Key Information Document (PRIIPS KID) of the subfund.

² These performance numbers are based on historical data and are no guarantee of future results. YTD: Performance since the 1st of January of the current calendar year. This is a cumulative return. Performance up to 18.08.2008 is that of the Athena Diversified Management subfund, of which the subfund Global Equity of MercLin SICAV is an identical successor. Performance between 19.08.2008 and 31.03.2023 is that of the subfund Global Equity of MercLin SICAV, of which the subfund MercLin Global Equity of Kempen International Funds is an identical successor.

³ MSCI AC World Euro Net dividend reinvested. The investment policy of the subfund does not include a tracking error objective with the benchmark. Performances of the subfund may therefore vary from the performance of the benchmark.

MANAGER'S COMMENT

During the month of September, the fund added a position in ASML. This Dutch company specializes in the development and manufacturing of lithography equipment used in the semiconductor industry. Through a network of highly specialized suppliers, ASML assembles what could be considered the most complex industrial tools ever produced. Inside a lithography machine, a series of high-precision mirrors guides a laser beam through a mask to print patterns as small as 10 nanometers onto the silicon wafer. These patterns will later form the integrated circuits that make up the chips. This process really is as complex as it sounds. In fact, it's so complex that competitors have given up on matching ASML's offer, making the company a quasi-monopolist. Naturally, this puts the company in a very privileged position. A single EUV machine easily costs more than 150m USD, with the next generation of High NA EUV costing twice that much. However, this steep price tag does not dissuade customers like TSMC, as lithography tools are considered the most important part of their 20 billion USD fabs. This has led some to dubbing ASML 'the toll booth to digitalization'. The company also has the financial history to match this flattering title: sales roughly doubled over the past 5 years, while also increasing the gross margin from 46% to over 50%. This trend is expected to continue – be it in a less steep fashion – thanks to increasing digitization & electrification, growing complexity of semiconductor technology and the elaborate chip reshoring plans of Western governments. This is an example of the application of the investment policy. Portfolio changes can occur at any time.

RISK INDICATOR

The risk indicator assumes that you keep the product for 5 years. The actual risk can vary significantly if you cash in before maturity and you may get back less.

The summary risk indicator is a guideline for the risk level of this product compared to other products. The indicator shows the likelihood of investors incurring losses on the product due to market developments or due to lack of funds for payment.

We have classified this product in class 4 out of 7; which is a medium risk class. This means that potential losses on future performance are estimated to be moderate.

Due to the effects of unusual market conditions, other risks may arise. Please refer to the prospectus for more information.

As this product is not protected against future market performance, you may lose all or part of your investment.

⁵ Ongoing charges: Charges taken from the subfund over a year, including management fees, the service fee for BNP Paribas of 0.1% and 0.14% taxes.

⁶ Transaction costs: Note that this is an approximation based on historical transaction costs paid by the subfund. Actual transaction costs may vary based on the number of transactions executed in the reported period.

Consult the prospectus of the UCI and the PRIIPS KID before investing. The **prospectus**, the **PRIIPS KID** and the **periodic reports** are available in English, free of charge from the Belgian representative of the financial agent: BNP Paribas S.A., Montagne du Parc 3, B-1000 Brussels or on www.merciervanderlinden.com/nl/fondsen/.
